

Program no:1

```
package calculator;

public class Launch
{
    public static void main(String[] args)
    {
        double a=20.3;
        double b=10.8;
        double c=a+b;
        double d=a-b;
        double e=a*b;
        double f=a/b;
        System.out.println("Addition result" + " "+ c);
        System.out.println("Substaction result" + " "+ d);
        System.out.println("multification result" + " "+ e);
        System.out.println("Addition result" + " "+ f);
    }
}
```
